something that's just up  
to me.  
Sometimes I manage to  
make some steps towards  
my dream, but they are  
not always planned.  
Happiness is when  
preparation and  
opportunity meet, so I  
make as many  
opportunities as possible  
from which I can develop  
something.  
Hard work and effort, but  
it doesn't guarantee  
success. No one gets  
more time.  
I go to therapy so that I  
have more free resources  
to live my life more  
vibrantly at the expense  
of my traumas.  
I raise money  
I'm going to the doctor  
I try not to knowingly  
harm myself  
I am looking for  
opportunities in different  
sels and day centres for  
seniors.  
I try to figure out how to

make the dream come true.  
Sometimes it's necessary to leave the dream alone for a while and do something else (another job, another hobby).  
Work  
I work hard to make ends meet.  
Doing what is necessary. Even if I don't want to do something.  
I work a lot and look for ways to earn extra income.  
I try to act accordingly. The universe will give if you ask nicely..and you have to do a little bit of work. To make dreams come true..nothing comes to you.  
Participate in all elections in all governance structures  
This is my roadmap, what others don't need to know - otherwise the dream won't come true.  
vote, get involved in community life, speak up when I have the chance.  
I look for different options and solutions depends on the dream  
I take care of myself to stay healthy. I save money for travel  
I try to live by living for myself and letting others live.  
I do sports for my health, discuss international issues with my family and friends to better understand each other, and improve my professional skills.  
I contribute through social activities and, of course, I make an effort in terms of my personal and family well-being.  
Studying and actively looking for a job  
I work hard, help my child to get an education, avoid activities that are harmful to my health.  
I don't have a very detailed plan for some things, but I have a bit of a vague idea - a rough idea of the direction I should take and a rough list of competences I want to acquire.

Our politicians and the opposition in parliament  
 All previous answers together  
 The ideological brainwashing that is going on in the western world, whereby decisions are being made that do nothing but harm to the citizens of the country. (mass immigration, green revolution, trans ideology, etc). All try to sit at the top of the moral tower without thinking about the consequences of these "morally good" decisions. In the US, the UK and several European countries, total absurdity on these issues is already happening. Normal human values are being demonised, and nothing is all  
 Useful idiots living abroad.  
 The European Union with its regulations and rules that are making so many businesses and individuals worse off.  
 European Union  
 Imposition of perversions from the West  
 Human stupidity and greed  
 Politicians should learn to communicate and negotiate and not to divide people among themselves.  
 There are no threats, politicians make them up  
 Estonia's policy  
 management of other states  
 The foreign threat is the Estonian Riigikogu.  
 Madmen, hypocrites and greedheads in power!  
 Military threat combined with economic problems  
 Estonia's boorish puppet government

such as political  
instability, economic  
problems, energy prices,

emigration, low birth  
rate, injustice, censorship,  
etc.

Fanatical idiots in power  
Loyal attitude to Putin's  
supporters who live in  
Estonia. Especially  
Russian citizens. Check  
the validity of their  
documents, conduct a  
questionnaire: if they  
support the war in  
Ukraine and love Putin,  
then expel them, so that  
they do not suffer at a  
distance.

All answers together  
Toompea "kindergarten"

EKRE and the extreme  
right

Stupidity  
A power that is against its  
own people.

Useful idiots

Stupid people with  
mental problems - the  
biggest contributor is  
social media and smart  
devices. A large number  
of people are living in a  
virtual bubble begging  
for dopamine, and mental  
presence as well as  
mental acuity has long  
since been lost.

Rude and self-centred  
attitude

fifth column

Officials are stirring up  
the situation and doing  
everything to the  
detriment of both  
Russians and Estonians

themselves.  
Fifth column a la kre  
centre party who are  
obviously anti Russian  
These problems are also  
created by politicians  
The state has betrayed  
people and broken  
promises. People are very  
divided  
Impotence of the  
government and their  
chosen course of giving  
in to anyone who pays.  
Deceit and humiliation of  
their own population,  
robbery at the expense of  
increasing their own  
income every month. The  
blatant increase of their  
salaries by 10+% every  
three months is a direct  
confirmation of that  
Silly politicians  
Collapse of medicine,  
education and economy  
Idiots in power  
Unqualified politicians

mitmes mõttes  
kahjulik: vaatame kasvõi

muutumist viimase 15a  
jooksul EL ja USA  
võrdluses; vaatame üldist  
suhtumist riskeerimisse,

ettevõtlusesse,  
enesekaitset, oma

see on EL-s pigem  
karistatud kui soovitud.  
EL on ka mitmes mõttes  
positiivne nähtus, kuid  
paljudes asjades läheb üle  
piiri ning liigub vales  
suunas. Suurendaksin  
kogukonna läbikäimist,  
mis oleks oluline nii  
üldise heaolu kui  
turvalisuse tõstmise  
vaatenurgast.

The laws and officials mentality has taken over the country: ban, cuff, poke and shoot. A citizen has to walk on his own private land.

To improve employment and financial situation Create reasons for young smart people to stay here, which is currently very scbackground-color:#eeeeee outside Tartu/Tallinn all over Estonia.

Provide decent cycle and pedestrian paths.

There are many places that could still be improved, while I think we are doing well overall, we could always do better, but many just whinge, not wanting to realise that we have actually come a long way in 30 years.

Totally free for business, cut business taxes, cut red tape.

All areas should be improved - improving just one area will not bring any welfare.

New work places  
Technical living environment: roads, streets, pavements, street lighting and other infrastructure: district heating, sanitation, etc.  
More affordable prices for food and other necessities.

Heritage houses are falling apart in Paide because nobody wants to buy them or renovate them properly. The requirements should be rewritten so that the outside of the building stays the same, but the inside can be altered to suit your vision. For example, remove walls, doors, stairs or partitions. What kind of protection is it if everyone is afraid of heritage protection laws and the houses are allowed to collapse.

All of the above  
Maybe then something would change if there were no refi rats everywhere.

Improve well-keeping

					Kui vähendada toetusi ja suunata inimesi ise hakkama saama (ning siis jalust ära tulla) võib väga palju positiivseid asju juhtuda. Kui meil on tugev keskklass ning hea sotsiaalne mobiilsus, on see hea mitte ainult kodanike ja riigi rahakotile ning üldisele heaolule vaid ka otseselt turvalisusele: inimesed tunneksid tugevamalt, et siin on hea keskkond mis väärib kaitset ning millesse panustada - lisaks sellele, et inimestel on, mida kaotada.

 lapsega peresid, kes on  
 väga keerulises seisus ja  
 nemad ise abi küsima ei  
 tule. Lapsed peaksid  
 olema KÕIK võrdsed.  
 Hea haridus, hea  
 tugisüsteem, võimalus  
 lastega rohkem kodus  
 olla.  
 Minu lapsed on eestlased  
 ja eestlased peaks elama  
 oma isamaal.  
 Võimalusel,kui oled  
 sündinudd maal ,mida  
 pead isamaaks , siis  
 peaksid siin ka elama ja  
 töötama.

 appi tulla kui vajan abi.  
 Eestis mulle meeldib  
 eestlased peaksid elama  
 ikka omal maal  
 See küsimus on  
 kohustuslik  
 Эта их Родина, здесь  
 пока безопасно. Есть  
 родные места, где они  
 выросли и растут их

своей стране, а другим.  
Зная, что своя страна

В реальности

С таким

нет будущего  
страна сама себя душит

Eestis on palgad madalad,  
maksud kõrged. Elu elada  
on raske. Jääb tunne, et  
töötad ainult selleks, et  
makse maksta ja elu  
nautida ei saa, sest kõik  
mida teha tahaks maksab  
jälle raha.  
Нет перспектив.

Ebastabiilsus, vaesus, Eesti

Siin ei ole olnud ega tule

Не знаю  
Praegune Eesti ei ole koht  
kus nad võiksid elada, on  
olemas teisi riike, kus  
hoolitakse oma

elab omas mullis ja  
tundub et neil puudub

У русского молодого

Правительство

Tuleviku vaates ei ole

Autorenhinweis: Einige dieser Variablen sind nicht numerisch, sondern sind in den Originaldaten tatsächlich Zeichenvariablen. In dieser Übersicht wurden sie jedoch in numerische Variablen umcodiert, da dies die einzige Möglichkeit ist, ihre Labels korrekt darzustellen. Dies ist wichtig zu beachten, wenn mit diesen Variablen für die Datenanalyse gearbeitet wird.

Dies sind die Variablen, die für eine maximal informative Übersicht von Zeichenvariablen in numerische Variablen umcodiert wurden:
